CODEFY

React developer at AI Startup

WE ARE

CODEFY - a successful young technology startup from Heidelberg. Over the last three years we have created a unique analytics software with AI that helps the judiciary, administration and leading companies to complete large and complex proceedings in a fraction of the time otherwise required and with far greater precision.

WE ARE LOOKING FOR

You! A great new team member to support our software development team in the area of frontend, preferably on a full-time basis; part-time engagements can also be taken into considersation.

REQUIREMENTS

- Experience with React
- 3 - 8 years of experience as a developer
- Computer science studies or training as an IT specialist or comparable knowledge and experience
- Reliable and independent way of working and ability to work in a team
- Enthusiasm for a variety of development activities

WE OFFER

- Meaningful work on innovative projects
- Flexible working hours and home office
- Young, friendly and motivated team
- Individual further training
- Competitive remuneration
